

ProHVM Professional (Host)

Price: €69.00 (excl. VAT)

SKU: 5412

Product Categories: [Software](#)

Product Page: <https://www.probus-it.com/product/prohvm-professional/>

Product Summary

With ProHVM you can manage Hyper-V Servers and virtual machines both locally and remotely. ProHVM enables you to manage multiple versions of Hyper-V in one application, and from almost any version of windows. Use it on Servers, desktops and Core installations both 32 and 64-Bit. Using ProHVM you can connect to and manage Hyper-V servers in other domains and workgroups using different credentials.

It is very useful on installations of free Microsoft Hyper-V Server where you cannot run Microsoft Hyper-V manager locally.

Product Description

With ProHVM you can manage Hyper-V Servers and virtual machines both locally and remotely. ProHVM enables you to manage multiple versions of Hyper-V in one application, and from almost any version of windows. Use it on Servers, desktops and Core installations both 32 and 64-Bit. Using ProHVM you can connect to and manage Hyper-V servers in other domains and workgroups using different credentials.

It is very useful on installations of free Microsoft Hyper-V Server where you cannot run Microsoft Hyper-V manager locally.

The Professional license is valid for **one managed host!** So if you want to manage two hosts you will have to buy two licenses. If you plan to manage a number of hosts you might want to buy the "Technician License". The Technician License allows you to manage any number of Hyper-V Hosts with the same features as in the ProHVM professional. You will only have to enter the serial one time in ProHVM and not worry about licensing the hosts separately. Note that the license is valid for one named user (Technician) where the regular Professional license is valid for one managed host.
